OECD Hiring Committee
OECD, Paris

October 5, 2026

Sub: Application for Statisticians-Data analysts position in Paris, France.

Dear Hiring Committee,

With great enthusiasm, I am writing to express my strong interest in the Statisticians-Data analysts position at the OECD. As an analytical and collaborative researcher, I am confident that my quantitative background and problem-solving skills would allow me to contribute meaningfully to your team.

As reflected in my resume, I have built experience in OECD consulting, applied economic research, and data analysis through my work at OECD, Queen's University, and the Institute for International Economic Studies. I am eager to apply my research, data collection, and statistical analysis skills to support evidence-based policy work and cross-country comparability.

As a prospective employee, I can immediately bring the following strengths to your team:

- **Strong analytical skills:** Through my consulting work at the OECD, I supported health care quality and outcomes data collection, automated validations, and calculations for delegate submissions. I also analyzed OECD member-state health indicators using econometric and statistical methods, and translated findings into clear narratives and visualizations for policymakers.
- **Ability to work independently and collaboratively:** In my role as a Data Analyst at the Institute for International Economic Studies, I analyzed data from 15,000 Swedish establishments using advanced statistical methods to strengthen research quality. At the same time, I worked closely with research teams to ensure data accuracy and consistency through careful collection and cleaning processes, while my research assistant work at Queen's University reinforced database building, validation, web scraping, and descriptive statistical analysis.

While my resume provides an overview of my background, I would welcome the opportunity to discuss in greater detail how my experience and motivation can support OECD's statistical work. I would be honored to contribute to the Organisation's work on data collection, analysis, and reporting.

Thank you for your time and consideration. I look forward to the possibility of speaking with you further about this opportunity.

Sincerely,

Jay Lee
