SUMMARY

Economics and data analysis candidate with OECD experience, firm-level research exposure, and strong quantitative skills, focused on empirical policy analysis, large datasets, and clear communication for policy audiences. **Core Competencies:** Econometrics | Quantitative Analysis | Statistical Analysis | Applied Research | Policy Analysis | Data Management | Data Validation | Data Visualization
Technical Acumen: Python | R | SQL | Stata | Tableau | Excel | Git | MATLAB | Jupyter Notebook | $\text{\LaTeX}$

EXPERIENCE

OECD 2025 – 2026

Consultant

- Validated and harmonized large international datasets for the Health Care Quality and Outcomes database, improving data reliability and cross-country comparability
- Analyzed healthcare indicators across OECD member states using econometric and statistical methods to support policy discussion
- Drafted OECD health reports and translated complex analysis into clear narratives and visualizations for policymakers and stakeholders

Institute for International Economic Studies 2023 – 2024

Data Analyst

Analyzed data from 150,000 Swedish firms using advanced statistical methods, data cleaning, and data management to strengthen research quality and generate robust insights for economic projects.

University of Toronto 2019 – 2020

Teaching Assistant

Supported economics courses for 300 students by coordinating coursework, proctoring exams, holding office hours, and grading assignments while upholding academic standards.

Queen's University 2019

Research Assistant

Built databases on Canadian politics, the economy, and education; used Python and web scraping to collect data; and improved dataset quality through kurtosis analysis and descriptive statistical checks.
