Core Competencies: Data Management | Policy Analysis | Quantitative Analysis | Statistical Modeling | Research & Policy Analysis | Data Quality | Stakeholder Communication | Data Visualization
Technical Acumen: Python | R | Git | SQL | Excel | Stata | Tableau | LaTeX

Experience

OECD 2025 – 2026
Consultant

- Modernized the Health Care Quality and Outcomes data collection by automating validations and calculations for delegate submissions, improving efficiency and cross-country comparability
- Analyzed healthcare indicators across OECD member states using econometric and statistical methods to assess disparities, strengthening the evidence base for policy discussions
- Supported OECD health reports by translating complex analyses into clear narratives and visualizations for policymakers and other stakeholders

Institute for International Economic Studies 2023 – 2024
Data Analyst

Analyzed data on 15,000 Swedish firms using advanced statistical methods, data cleaning, and data management techniques to strengthen research quality, improve dataset reliability, and generate robust insights for economic projects.

University of Toronto 2019 – 2020
Teaching Assistant

Supported delivery of economics courses for 300 students by coordinating coursework, proctoring exams, leading office hours, and grading assignments, helping uphold academic standards and foster an effective learning environment.

Queen's University 2019
Research Assistant

Built and validated research databases on Canadian politics, economics, and education, conducted survey outreach to 2,000 politicians, and used web scraping and descriptive statistical analysis to improve data completeness and support policy-oriented research.
