To
Hiring Committee,
Organisation for Economic Co-operation and
Development (OECD)

September 17, 2026

Sub: Application for Data Scientist Position in Paris.

Dear Hiring Committee,

With great enthusiasm, I am writing to express my strong interest in the Data Scientist position at the OECD. As an analytical and collaborative researcher, I am confident that my quantitative research background and problem-solving skills would allow me to contribute meaningfully to your team.

As reflected in my resume, I have built a range of experiences in applied policy research and data analysis through my work at the OECD and the Institute for International Economic Studies. I am eager to apply my research, econometric, and interpersonal skills to support well-being analysis, data visualization, and evidence-based policy outputs.

As a prospective employee, I can immediately bring the following strengths to your team:

- **Strong analytical skills:** As a Consultant at the OECD, I analyzed healthcare indicators across OECD member states using econometric and statistical methods. I managed data using R, SQL, and Excel, reviewed and validated research data, and translated complex findings into concise summary reports and visualizations for policy audiences.
- **Ability to work independently and collaboratively:** In my role at the Institute for International Economic Studies, I independently analyzed data from 15,000 Swedish establishments using advanced statistical methods to strengthen research quality. At the same time, I worked closely with research teams to ensure data accuracy and consistency through careful collection and cleaning processes. By developing efficient solutions to data management challenges, I contributed to more reliable analyses, stronger insights, and improved project outcomes.

While my resume provides an overview of my background, I would welcome the opportunity to discuss in greater detail how my experience and motivation can support the OECD's work on well-being data, analysis, and reporting. I would be honored to contribute to the innovative work being carried out by WISE.

Thank you for your time and consideration. I look forward to the possibility of speaking with you further about this opportunity.

Sincerely,

Jay Lee
