## SUMMARY

---

Economist and data analyst with OECD experience, strong econometrics and statistical analysis, and a track record in data visualization and policy analysis using R and Git.

**Core Competencies:** Data Analysis | Econometrics | Statistical Modeling | Research & Policy Analysis | Data Management | Project Execution | Data Visualization | Stakeholder Communication

**Technical Acumen:** Python | R | Git | SQL | Excel | Stata | Tableau | L<sup>A</sup>T<sub>E</sub>X

## EXPERIENCE

---

### OECD

2025 – 2026

#### *Consultant*

- Modernized the Health Care Quality and Outcomes data collection by automating validations and calculations for delegate submissions, improving efficiency and cross-country comparability
- Analyzed healthcare indicators across OECD member states using econometric and statistical methods to assess disparities, strengthening the evidence base for policy discussions
- Supported OECD health reports by translating complex analyses into clear narratives and visualizations for policymakers and other stakeholders

### Institute for International Economic Studies

2023 – 2024

#### *Data Analyst*

Analyzed data on 15,000 Swedish firms using advanced statistical methods, data cleaning, and data management techniques to strengthen research quality, improve dataset reliability, and generate robust insights for economic projects.

### University of Toronto

2019 – 2020

#### *Teaching Assistant*

Supported delivery of economics courses for 300 students by coordinating coursework, proctoring exams, leading office hours, and grading assignments, helping uphold academic standards and foster an effective learning environment.

### Queen's University

2019

#### *Research Assistant*

Built and validated research databases on Canadian politics, economics, and education, conducted survey outreach to 2,000 politicians, and used web scraping and descriptive statistical analysis to improve data completeness and support policy-oriented research.
