Sub: Application for Junior Data Analyst.

Dear Hiring Committee,

I am writing to express my strong interest in the Junior Data Analyst position at the OECD. With a background in economics and experience supporting policy-focused research and data analysis, I am confident I could contribute meaningfully to the Trade and Agriculture Directorate's work.

As reflected in my resume, I have built a strong foundation in econometric and statistical analysis through my MRes in Analysis & Policy in Economics, MA in Economics, and BSc in Economics with a Math minor. I also bring OECD consulting experience, where I supported report development and analyzed indicators across member states. I am eager to apply my data collection, database, and quantitative analysis skills to the Agricultural Outlook and related policy work.

As a prospective employee, I can immediately bring the following strengths to your team:

- **Strong analytical skills:** I have experience applying econometric and statistical methods to quantitative research, along with building and validating research databases and improving data completeness. I also use Python, Excel, SQL, R, Stata, and Tableau to manage and analyze data efficiently and to support clear, policy-relevant outputs.
- **Ability to work independently and collaboratively:** In my OECD consulting work, I supported report development and analysis across member states, which strengthened my ability to contribute in an international, policy-oriented setting. I am comfortable translating complex analysis into concise narratives and visualizations, and I value careful data management, accuracy, and teamwork in multicultural environments.

While my resume provides an overview of my background, I would welcome the opportunity to discuss in greater detail how my experience and motivation can support the OECD's research and data needs. I would be honored to contribute to work that informs evidence-based policy on agriculture and food markets.

Thank you for your time and consideration. I look forward to the possibility of speaking with you further about this opportunity.

Sincerely,

Jay Lee
